EDUCATION

Technical University of Crete

Sep. 2020 – present

Diploma in **Electrical and Computer Engineering** (Integrated Masters Degree)

Chania, Greece

- **Expected to Graduate in Jun. 2026**
- **Coursework:** Data Structures, Algorithms, Databases, Computer Systems, Machine Learning

Thesis

Nov. 2025 - present

Scheduling System for StelarkLMS Knowledge Data Lake

Technical University of Crete

- Extending the Workload Task Scheduling system for better efficiency.
- Implementing through Kubernetes and the Kueue framework.

EXPERIENCE

FlexCar - Leasing Car Company

Jul. 2025 – Aug. 2025

Internship - Junior Web Developer

Chania, Greece

- Built reusable **React** components used across multiple internal dashboards.
- Engineered and maintained type-safe **PostgreSQL** schema migrations.
- Added **Unit Tests** increasing code coverage and reliability.
- Collaborated in an Agile team environment (daily standups, sprint planning).

Technologies: ReactJS, Node.js, Next.js, TypeScript, PostgreSQL, DrizzleORM, Zod, Tanstack Query, Github, Slack, Jira

PROJECTS

Development and Deployment of an E-Commerce Platform

- Designed, Developed, and Deployed a **Full-Stack E-commerce application** using **ReactJS**, **HTML**, and **CSS**.
- Implemented Backend services with **Node.js**, handling business logic and API communication.
- Integrated **Apache Kafka** to manage event-driven updates and asynchronous data flows.
- Implemented secure authentication and authorization using **Keycloak**.
- Deployed the application on **Google Cloud**.

Command-Line Turn based game with Golang

- Designed and developed a turn-based command-line game using **Go**.
- Implemented core Game Mechanics including player movement, Enemy Combat, and Turn-Based logic.
- Developed a Leveling and Progression system affecting player stats and gameplay difficulty.

3D Puzzle Game

- Designed and developed an immersive 3D puzzle game with combat mechanics using **Unity**.
- Implemented Player quests, Puzzle-Solving mechanics, and a Real-Time Combat System.
- Utilized Unitys built-in tools for Scene Design, Physics, and Gameplay logic.

SKILLS

Languages : Python, JavaScript, TypeScript, Java, Scala, C/C#, Golang

Frontend : ReactJS, Next.js, HTML, CSS

Backend / DevOps: Kubernetes, Docker, Google Cloud, Kueue

Tools : Git, Jira, Unity, Excel, PowerBI
