SUMMARY

Software Engineering student at the Technical University of Crete (Greece), currently completing my Thesis. Seeking an **Erasmus+ Software Engineering Internship** in Warsaw, Poland, **starting after September**, with a strong interest in Hands-On Development and Real-World Engineering challenges.

EDUCATION

Technical University of Crete

Sep. 2020 – present

Diploma in **Electrical and Computer Engineering** (Integrated Masters Degree)

Chania, Greece

- **Expected to Graduate in Jun. 2026**
- **Coursework:** Data Structures, Algorithms, Databases, Computer Systems, Machine Learning

Thesis: Scheduling System for StelarkLMS Knowledge Data Lake

Focused on Scheduling and Orchestration of Containerized Workloads in a data lake environment, using **Kubernetes** and **Kueue**.

EXPERIENCE

FlexCar - Leasing Car Company

Jul. 2025 – Aug. 2025

Internship - Junior Web Developer

Chania, Greece

- * Worked as a **Full-Stack Web Developer Intern** in a hybrid work environment for **2 months**.
- * Designed and implemented reusable Front-End Modules with **ReactJS** and **TypeScript**.
- * Updated **PostgreSQL** Schemas using **DrizzleORM** and **Zod** for type-safe schema validation and type checking.
- * Implemented **Unit Tests** to ensure correctness and reliability of the codebase.
- * Worked as **part of a four-member team**, participating in daily meetings.

Technologies: ReactJS, Node.js, Next.js, TypeScript, PostgreSQL, DrizzleORM, Zod, Tanstack Query, Github, Slack, Jira

PROJECTS

Development and Deployment of an E-Commerce Platform

- Designed, Developed, and Deployed a **Full-Stack E-commerce application** using **ReactJS**, **HTML**, and **CSS**.
- Implemented Backend services with **Node.js**, handling business logic and API communication.
- Integrated **Apache Kafka** to manage event-driven updates and asynchronous data flows.
- Implemented secure authentication and authorization using **Keycloak**.
- Deployed the application on **Google Cloud**.

Command-Line Turn based game with Golang

- Designed and **developed a turn-based command-line game** using **Go**.
- Implemented core Game Mechanics including player movement, Enemy Combat, and Turn-Based logic.
- Developed a Leveling and Progression system affecting player stats and gameplay difficulty.

3D Puzzle Game

- Designed and **developed an immersive 3D puzzle game** with combat mechanics using **Unity**.
- Implemented Player quests, Puzzle-Solving mechanics, and a Real-Time Combat System.
- Utilized Unitys built-in tools for Scene Design, Physics, and Gameplay logic.

Certificates

React The Complete Guide

Online Udemy Certification

Apr. 2025

Academind

- **Covered modern React concepts** concepts including **Hooks**, **Redux**, **Next.js**, and **TypeScript**.
- Gained hands-on experience in building scalable, production-ready web applications.

Technologies: React, Redux, Next.js, TypeScript, JavaScript

Go The Complete Guide

Online Udemy Certification

Dec. 2025

Academind

- **Gained solid experience with Golang**,
- Understanding its core characteristics, by Developing multiple projects.

Technologies: Go, CLI Applications

Hack the Football Data

Online Certification

Sep. 2025

Workearly

- **Analyzed Football Datasets** using **Excel** and **Power BI**, creating visualizations to identify patterns and trends.
- Utilized **Python** for **Data Processing**, analysis, and insight generation.

Technologies: Python, Pandas, Excel, Power BI

SKILLS

Languages : Python, JavaScript, TypeScript, Java, Scala, HTML/CSS, PostgreSQL, C/C#, Golang, VHDL

Tools : Github, Jira, Unity, Excel, PowerBI, Python Pandas, Kubernetes, Docker
